### Description of Services:

A+ LEARNING ACADEMY INC provides supplemental educational services and mentoring for all students. The learning will be taught in a fun and exciting ways using research-based programs that are interactive and of high interest to students. . With technology as our primary platform of instruction, the basic curriculum has been designed to strengthen and transfer cognitive knowledge in the core areas of reading/language arts, math, science, and social studies. We also work with low income students and other students who need preparation in study skills, test preparation, English As A Second Language and life skills. A+ LEARNING ACADEMY INC. will use previous assessments (i.e. District benchmark, TAKS results), teachers feedback and a company assessments, to determine the students need. A+ LEARNING ACADEMY INC will also provide mentoring to students which includes life skills and a guess speaker from different professions to motivate students to study and stay in school.

### Description of Instructor Qualifications:

Instructors who will provide services are Texas board certified professionals. These individuals have met all of the requirements for working with children that are identified by state regulatory agencies (eg. Drug free, passed criminal background checks, etc.). Additionally, they will receive professional development training prior to starting as a tutor. The health, safety and welfare of children is of most importance and tutors will have undergone a stringent background and reference check before working with A+ LEARNING ACADEMY INC.

### Description of Evidence of Effectiveness:

A+ LEARNING ACADEMY INC. uses materials that are aligned with the Texas Essential Knowledge and Skills (TEKS) and the Texas Assessment of Knowledge and Skills (TAKS). Students progress will be monitored biweekly using a grade check that will be given to the instructor as well as monthly in-house assessments. A+ LEARNING ACADEMY INC will also use ongoing district and state assessments (i.e. Benchmarks, ACP, and TAKS) results. This will also be used to evaluate tutor effectiveness.
