Description of Services:

Whether your child needs help with one subject or in all subjects, Click2Tutor can help. We tutor one-on-one via the internet. Your child will get his/her own live online tutor to help with school work in math, english or science. Here's how Click2Tutor works:
Skills Assessment – Click2Tutor begins by identifying your child's specific tutoring needs with an Assessment test.
Personalized Tutoring Programs – We create a personalized tutoring program just for your child.
Individual Tutoring Attention – Click2Tutor tutors work with each child individually, so your child receives the specific tutoring help he or she needs. To ensure true understanding, students are taught to master a skill before they move on to the next level. We provide you free tutoring software that allows your child to speak with our tutor and 'see' what our tutor is teaching.

Description of Instructor Qualifications:

Trained and Experienced Teachers – Our teachers are highly trained and experienced and they love tutoring. Click2Tutor works with a large pool of expert tutors to bring our students high-quality, one-to-one services every day. Our tutors hold either a bachelors or masters degree, college professors, and professionals with college degrees in the subjects they teach. Our tutors have on average 7+ years teaching experience. Each tutor first completes the rigorous Click2Tutor Selection Program.
The Tutors are screened through several rounds of interviews by highly qualified and competent persons who have contributed to the field of education over several decades. The selection process is very rigorous and only those who fully measure up to the stringent standards set by Click2Tutor are called upon to shoulder the responsibilities of online tutoring.

Description of Evidence of Effectiveness:

Using State of the art technology, we have a total classroom environment in the privacy of your home and more importantly, private sessions between the student and tutor. The students interact with our teachers using digital writing pad, the electronic whiteboard and voice all bundled together.
Our tutoring is aligned with the school and the school district curriculum. Our tutoring sessions can be arranged at any place with a fast internet connection: example, student's home, a library, the school computer lab, or a faith based institution like a Church. We administer intensive intervention programs aligned with the standards adopted by different State Boards of Education which reinforce content areas in mathematics, science and social studies. Our services ARE aligned with the Texas Knowledge and Skills (TEKS) and the TAKS.
In addition, all children receive test preparation and study skills instruction to assure not only progress in school but also on state-wide assessments.
We provide the student's teacher with reports detailing strengths, weaknesses, and progress of their student.
