

ANCILLARY MATERIALS

The ancillary materials that support this curriculum are rich and varied. They exemplify historical traditions and contemporary art forms from throughout the ancient and modern world. The prints, slides, and transparencies may be used to illustrate numerous concepts and points of view. The textbooks provide opportunities for students to read, and contain innumerable visual images. The teacher's textbook editions and resource binders offer invaluable support for planning and curricular development.

Suggestions for the use of specific materials are noted in this curriculum guide. However the abundance of these materials prohibits a complete listing of their applications. Teachers are encouraged to study them carefully and to use them in unique and creative ways.
