

ART CLASS SUPPORT FOR ACHIEVING DISTRICT GOALS

The responsibilities of the middle school art teacher are many and varied. The art specialist plans and teaches a broad-based art curriculum to a wide range of students and interacts with the administrative staff and other teachers to establish the cultural climate of the school.

Additionally the art teacher supports District goals for student learning by integrating the content of special programs into the art curriculum. Specific expectations are outlined in the District publications, *Secondary Student Expectations* and *Integrating Special Programs into the Curriculum*. These publications are available to all teachers, and art teachers are expected to be aware of their content.
