

## Components of a Science Lesson

### 5-E Instructional Model for Science Education

*(Building a Presence for Science)*

<b>Engage</b>	In thinking about a new idea or concept
<b>Explore</b>	The concept by participating in one or more activities
<b>Explain</b>	The idea by constructing an understanding of the concept from common experiences provided by the activities
<b>Elaborate</b>	An understanding of the idea by applying it to new situations, often by doing another activity
<b>Evaluate</b>	The understanding of this idea. If the evaluation shows success in understanding the idea, it is time to be engaged in a new idea.
