RFP #09-01 SCHOOL INSTRUCTIONAL MATERIALS AND SERVICES

The District needs you, the vendor, to supply us with your proposal the information we need to determine your standard prices that are subject to the discount you propose.

This may be store shelf price, web catalogue, print catalogue or what ever method you use to tell your customers your standard pricing. We will then take that pricing and apply the discount you propose to determine our price for your goods or services.

It is preferred that the District have electronic access, (web link) to the standard pricing and if so, we do not require any other method that you may have available, but if print catalogue is the only method and it is not available on the web for download, please send a hard copy print catalogue with your response.

If you only have a store front locally, you need only stipulate that your standard pricing is current shelf price in your brick and mortar storefront and no other pricing method applies, then we will apply your proposed discount to that store shelf price.

If you discounts are "varies depending on product or quantity" then we will apply the discount you quote to us at the time of quote/purchase to your then current standard pricing.
