

Addendum #1 to RFQ #09-32

5/5/09

QUALIFICATIONS OF PROPOSER/PERSONNEL:

...records of air monitoring for asbestos as required by OSHA Regulations...

Vendor Question:

Could you clarify what it is that you need in response to the above statement? Our air monitoring is always done by the consultant or 3rd party air monitor and we have requested this information from them, but they are not allowed to provide it for us. The consultant sends the records directly to the client, but we could never get a copy. Please advise.

Response:

The District's asbestos consultant handles the air monitoring tests for Irving. The contractors are responsible for their own tests relative to their worker's safety.
