

Addendum # 1 to CSP #09-37

5/19/09

Printing of Testing Materials

Vendor Question:

Where does the figure 37,406 com from in Item 8 TEKS check 8?

Response:

We administer different tests at different times. For instance, during TC8, we will administer reading and math for grades 2-5, a writing test for grades 2, 3, and 5, math GT tests for grades 3-5, and a social studies test for grades 4 and 5. Using the charts that are included with the RFP, I take the projected enrollment numbers and add them together, along with my district overage needs, and come up with an approximate total of 37,406 tests during that testing period. Remember these are approximate numbers for vendors to use. Tests may vary in length as indicated on the RFP, and student enrollment may change, as I am using projected enrollment numbers for the 2009-2010 school year.

Question:

Is that number supposed to directly relate to the attached grids?

Response:

Yes, but keep in mind that these are projected enrollment numbers, which are subject to change when the actual enrollment is recorded.
